

February 11th
GRIN Meeting

How to get your invention made in China

This month's meeting will get you up-to-date on the process to import and custom manufacture from China, including a brief history of container shipping, US customs classifications and the harmonized tariff schedule, free trade zone, along with examples of what can go right and what can go very wrong. If you are thinking about manufacturing overseas, you will not want to miss this meeting.

Mary Ann Ferris-Young is a West Michigan native and lives in Comstock Park. She has 20 plus years of experience in corporate America in sales, marketing and product development. She used these attributes to start Michigan Global Trade, LLC, an import company specializing in sourcing high-quality products worldwide. Personally, she is a mom to an eight old, wife and all-in, women-owned business.
